December 1989

AUTHOR INDEX VOLUME 8 (1989)

The issue number is given in front of the page numbers

Aboudi, R., Å. Hallefjord, R. Helming and K. Jørnsten, A note on the pivot and complement heuristic for 0–1 programming problems (1) 21– 23
Akgül, M., Erratum to 'A sequential dual simplex algorithm for the linear assignment problem' (2) 117
Arkin, E., D. Joneja and R. Roundy, Computational complexity of uncapacitated multi-echelon production planning problems (2) 61– 66
Baker, K.R., *see* C.N. Potts (6) 297–303
Ball, M.O., B.L. Golden and R.V. Vohra, Finding the most vital arcs in a network (2) 73– 76
Ballard, J.L., *see* F. Choobineh (5) 265–270
Barahona, F. and W.H. Cunningham, On dual integrality in matching problems (5) 245–249
Bartholdi, III, J.J., J.H. Vande Vate and J. Zhang, Expected performance of the shelf heuristic for 2-dimensional packing (1) 11– 16
Berg, M., *see* M.J.M. Posner (6) 339–345
Bertsimas, D. and M. Grigni, Worst-case examples for the spacefilling curve heuristic for the Euclidean traveling salesman problem (5) 241–244
Billionnet, A. and B. Jaumard, A decomposition method for minimizing quadratic pseudo-Boolean functions (3) 161–163
Bland, R.G. and D.F. Shallcross, Large traveling salesman problems arising from experiments in X-ray crystallography: A preliminary report on computation (3) 125–128
Bunn, D. and R.M. Oliver, Combinations of forecasts: A model-building perspective (4) 179–184
Chandrasekaran, R., *see* N. Megiddo (6) 305–308
Chang, G.J., Total domination in block graphs (1) 53– 57
Chang, Y.-L., *see* T. Sueyoshi (4) 205–214
Choobineh, F. and J.L. Ballard, A method of confidence interval construction for simulation output analysis (5) 265–270
Chopra, S., On the spanning tree polyhedron (1) 25– 29
Chung, K.-J., A note on maximal mean/standard deviation ratio in an undiscounted MDP (4) 201–203
Chvátal, V., A note on the traveling salesman problem (2) 77– 78
Cooper, R.B. and S. Palakurthi, Heterogeneous-server loss systems with ordered entry: An anomaly (6) 347–349
Coppersmith, D. and P. Raghavan, Multidimensional on-line bin packing: Algorithms and worst-case analysis (1) 17– 20
Cunningham, W.H., *see* F. Barahona (5) 245–249
Daigle, J.N., Queue length distributions from probability generating functions via discrete Fourier transforms (4) 229–236
Dallery, Y., An improved balanced job bound analysis of closed queueing networks (1) 59
Dijk, N.M. van, Blocking of finite source inputs which require simultaneous servers with general think and holding times (1) 45– 52
Dorhout, B., *see* W.M. Nawijn (6) 329–335
Dudziński, K., On a cardinality constrained linear programming knapsack problem (4) 215–218
Duin, C.W. and A. Volgenant, An edge elimination test for the Steiner problem in graphs (2) 79– 83
Erlenkotter, D., Average cost expansion sequencing (4) 185–187
Feo, T.A. and M.G.C. Resende, A probabilistic heuristic for a computationally difficult set covering problem (2) 67– 71
Fujiwara, O., *see* D.B. Khang (5) 261–264
Fuller, J.D. and Y. Wu, Effects of supply elasticity on convergence on the PIES algorithm (5) 271–277
Goemans, M.X., Valid inequalities and separation for mixed 0–1 constraints with variable upper bounds (6) 315–322
